Sub: Discontinued Product

Effective immediately, Ohmite's TK/TN Series of resistors will be discontinued once our current inventory is depleted. This is due to material availability, high minimum order requirements for that material, and relatively low annual usage of this series. Below is a list of the effected part numbers. Regional Managers have copies of the 2012 POS for these parts so end customers can be notified.

TK/TN was essentially a TO-220 type of resistor and we recommend our TAH20 Series as a suitable replacement for it. Distributors holding inventory are invited to return any TK/TN Part Numbers which they choose, and any such return will not be applied to their annual stock rotation.

Best Regards,

Kirk Schwiebert
Director of Product Development
