

Monitoring relays - GAMMA series  
 Zoom voltage 24 to 240V a.c./d.c.  
 2 change-over contacts  
 External reset key connectable  
 Width 22.5mm  
 Industrial design

## Technical data

### 1. Functions

Temperature monitoring of the motor winding (max. 6 PTC) with fault latch, for temperature probes in accordance with DIN 44081  
 Test function with integrated test/reset key

### 2. Time ranges

|                            |                  |
|----------------------------|------------------|
|                            | Adjustment range |
| Start-up suppression time: | -                |
| Tripping delay:            | -                |

### 3. Indicators

|                 |                              |
|-----------------|------------------------------|
| Green LED ON:   | indication of supply voltage |
| Red LED ON/OFF: | indication of failure        |

### 4. Mechanical design

Self-extinguishing plastic housing, IP rating IP40  
 Mounted on DIN-Rail TS 35 according to EN 60715  
 Mounting position: any  
 Shockproof terminal connection according to VBG 4 (PZ1 required), IP rating IP20  
 Tightening torque: max. 1Nm  
 Terminal capacity:  
 1 x 0.5 to 2.5mm<sup>2</sup> with/without multicore cable end  
 1 x 4mm<sup>2</sup> without multicore cable end  
 2 x 0.5 to 1.5mm<sup>2</sup> with/without multicore cable end  
 2 x 2.5mm<sup>2</sup> flexible without multicore cable end

### 5. Input circuit

|                           |                      |  |
|---------------------------|----------------------|--|
| Supply voltage:           | 24 to 240V a.c./d.c. | terminals A1-A2 (galvanically separated) |
| Tolerance:                | 24 to 240V d.c.      | -20% to +25%                             |
|                           | 24 to 240V a.c.      | -15% to +10%                             |
| Rated frequency:          | 24 to 240V a.c.      | 48 to 400Hz                              |
|                           | 48 to 240V a.c.      | 16 to 48Hz                               |
| Rated consumption:        |                      | 4.5VA (1W)                               |
| Duration of operation:    |                      | 100%                                     |
| Reset time:               |                      | 500ms                                    |
| Wave form for a.c.:       |                      | Sinus                                    |
| Residual ripple for d.c.: |                      | 10%                                      |
| Drop-out voltage:         |                      | >15% of the supply voltage               |
| Overvoltage category:     |                      | III (in accordance with IEC 60661-1)     |
| Rated surge voltage:      |                      | 4kV                                      |

### 6. Output circuit

2 potential free change-over contacts  
 Rated voltage: 250V a.c.  
 Switching capacity: 750VA (3A / 250V a.c.)  
 If the distance between the devices is less than 5mm.  
 Switching capacity: 1250VA (5A / 250V a.c.)  
 If the distance between the devices is greater than 5mm.  
 Fusing: 5A fast acting  
 Mechanical life: 20 x 10<sup>6</sup> operations  
 Electrical life: 2 x 10<sup>5</sup> operations  
 at 1000VA resistive load

|                       |  |
|-----------------------|--|
| Switching frequency:  | max. 60/min at 100VA resistive load<br>max. 6/min at 1000VA resistive load<br>(in accordance with IEC 60947-5-1) |
| Overvoltage category: | III (in accordance with IEC 60664-1)   |
| Rated surge voltage:  | 4kV  |

### 7. Measuring circuit

|   |   |
|---|---|
| Input:                                    | terminals T1-T2   |
| Initial resistance:                       | <1.5kΩ  |
| Response value (relay in off-position):   | ≥3.6kΩ  |
| Release value (relay in on-position):     | ≤1.8kΩ  |
| Disconnection (short circuit thermistor): | no  |
| Measuring voltage T1-T2:                  | ≤2.5V d.c. at R ≤4.0kΩ (in accordance with DIN VDE 0660 part 302) |
| Overvoltage category:                     | III (in accordance with IEC 60664-1)                              |
| Rated surge voltage:                      | 4kV   |

### 8. Control contact R

|                       |  |
|-----------------------|--|
| Function:             | external reset key                                   |
| Loadable:             | no   |
| Line length R-T2:     | max. 10m (twisted pair)                              |
| Control pulse length: | -  |
| Reset:                | potential free normally open contact, terminals R-T2 |

### 9. Accuracy

|                        |                               |
|------------------------|-------------------------------|
| Base accuracy:         | ±10% (of maximum scale value) |
| Frequency response:    | -                             |
| Adjustment accuracy:   | -                             |
| Repetition accuracy:   | ≤1%                           |
| Voltage influence:     | ≤2.2%                         |
| Temperature influence: | ≤0.1% / °C                    |

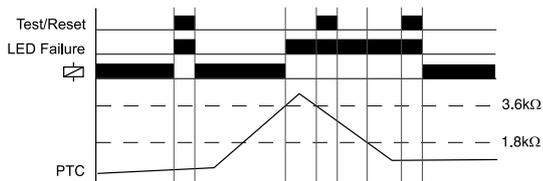

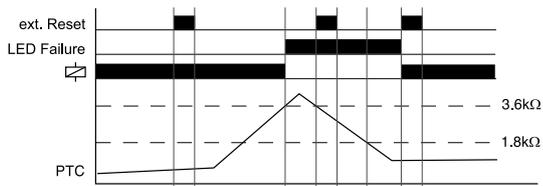

### 10. Ambient conditions

|                        |   |
|------------------------|---|
| Ambient temperature:   | -25 to +55°C (in accordance with IEC 60068-1)<br>-25 to +40°C (in accordance with UL 508) |
| Storage temperature:   | -25 to +70°C  |
| Transport temperature: | -25 to +70°C  |
| Relative humidity:     | 15% to 85%<br>(in accordance with IEC 60721-3-3 class 3K3)                                |
| Pollution degree:      | 3 (in accordance with IEC 60664-1)  |
| Vibration resistance:  | 10 to 55Hz 0.35mm<br>(in accordance with IEC 60068-2-6)                                   |
| Shock resistance:      | 15g 11ms<br>(in accordance with IEC 60068-2-27)   |

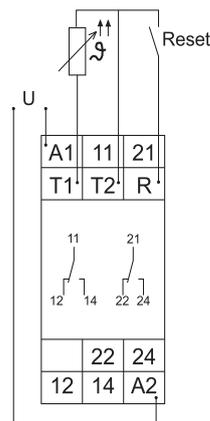

## Functions

If the supply voltage U is applied (green LED illuminated) and the cumulative resistance of the PTC-circuit is less than 3.6kΩ (standard temperature of the motor), the output relays switch into on-position. Pressing the test/reset key under this conditions forces the output relays to switch into off-position. They remain in this state as long as the test/reset key is pressed and thus the switching function can be checked in case of fault. The test function is not effective using an external reset key.

When the cumulative resistance of the PTC-circuit exceeds 3.6kΩ (at least one of the PTCs has reached the cut-off temperature), the output relays switch into off-position (red LED illuminated). The output relays again switch into on-position (red LED not illuminated), if the cumulative resistance drops below 1.8kΩ by cooling down of the PTC and either a reset key (internal or external) was pressed or the supply voltage was disconnected and re-applied.
