

## Product Change Notification – Minor change

<b>PCN #:</b> PCN22-0043	<b>Rev:</b> 1.0	<b>Issue Date:</b> March 16, 2022
--------------------------	-----------------	-----------------------------------

**Purpose of notification:** Change of voltage regulator  
**Type of notification:** Minor change, for informational notice only

**Detailed Description:**

This document informs about a BOM change of the X-600m2 (2280) SATA product series and provides advice on the implications as well as on any requalification effort for affected customers.

Swissbit has been notified that Intel is ceasing production of the voltage regulators currently used in the above mentioned product series. Swissbit has selected new fit-for-purpose voltage regulators, which also require a minimal PCB adjustment.

	Current voltage regulators	New voltage regulators
<b>Supplier</b>	Intel	Torex
<b>Continuous output current</b>	0.6A	1A
<b>Operating range</b>	2.4 V – 5.5 V	2.5 V – 5.5 V
<b>Operating Temperature Range</b>	-40 to +85°C	-40 to +105°C
<b>Output voltage</b>	Adjustable	Fixed
<b>Package Size</b>	2.5mm x 2.25mm x 1.1mm	2.5mm x 2.0mm x 1.04mm

In parallel with the replacement of the regulator for the Flash I/O supply, a load switch was removed and a LDO was added. This measure reduces the current consumption and improves the quality of the Flash I/O supply.

Swissbit insures no change of form and fit and function compatibility. The performance values will not change. Swissbit insures full compliance and backward compatibility with the previous version.

**Quality impact:** No impact

**Reliability impact:** No impact
