Re: Obsolescence for Model(s) 40260, 40264 and 40283

Due to purchased material obsolescence of internal resistors, Anaren catalog power divider model(s) number 40260, 40264 and 40283 are no longer supported in the current design. With the low demand for this item, Anaren Microwave Inc cannot justify the allocation of engineering resources for design updates. This notice is effective immediately. Please consider this letter the formal notification of our intent.

Presently we do have quantity 5 of model 40260 in stock and willing to sell knowing that these will be NCNR.

Your contact point regarding this correspondence is:

Les Recore
Senior Product Line Engineer
