Description

The MASW-011102 is a versatile, broadband, non-reflective, high isolation SPDT switch offered in a lead-free 3 mm 14-lead PQFN surface mount plastic package. The switch operates from DC to 30 GHz and provides <1.8 dB insertion loss and >40 dB isolation. The combination of broadband performance along with fast switching and excellent settling time make this device ideal for many applications, including test & measurement, EW and broadband communication systems.

The MASW-011102 uses MACOM's robust process with full surface passivation for high performance and high reliability.
