

## Product Change Notice

This notice is intended to inform customers when a Price List product has undergone design changes or been removed from SV Microwave’s Price List. Design changes that are deemed relevant to form, fit or function will be identified.

	PN	Replacement PN <i>(if applicable)</i>	Description
<b>Product Identification:</b>	1511-60071	N/A	Connector design updated to match current design standards.
<b>Reason for Change:</b>	<p>Previous revision was more difficult to assemble and had more performance variation. We expect this change to lead to fast lead time due to updated BOM, less out of stock conditions, higher and more consistent performing parts, and lead to product that continues to exceed our customer expectations.</p> <p>This specifies the change from Rev A to Rev B. There has been a new update to Rev C that only corrects the typo in the title block that doesn’t affect the product.</p>		
<b>Identification Method to Distinguish Change:</b>	<p>This new version Rev B and C has a clamp nut in the back with a large exit radius and the previous Rev A has the ferrule protruding from the back. Most of the other external connector features remained the same.</p> <p>The cable assembly instructions have been updated to be 300-33-010 for Rev B and C and was 300-15-034 for Rev A.</p>		
<b>First Available Order Date:</b>	January 2020
