Materials

- 1. Brass, nickel plating, 1µ minimum
- 2. Nylon PA46, black

Electrical requirements

Dielectric strength: 1 min @ 250 Vac Insulation resistance: 100 M Ω @ 500 Vdc Contact resistance: 50 m Ω or less

Mechanical requirements

Insertion force: 0.3 ~ 4 kgf Withdrawl force: 0.3 ~ 4 kgf

Durability: 5000 mating cycles while maintaining insertion force of $0.3 \sim 4$ kg; withdrawl force of $0.3 \sim 4$ kg; contact resistance of $50m\Omega$ or less.

Environmental tests

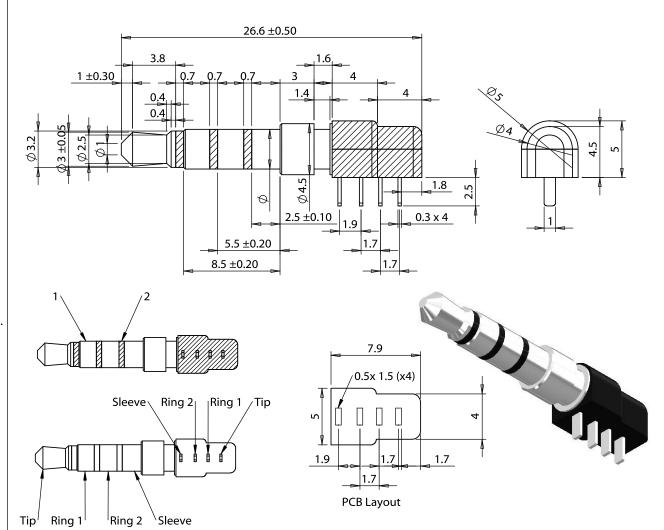

Damp test: 40 °C, RH 90-100% for 96 hrs. Cool to ambient and recover for 2 hours. Maintain dielectric strength of 500 Vac for 1 min, insulation resistance of 50 M Ω @ 500 Vdc minimum.

Dry test: 70 °C, RH 70-85% for 96 hrs. Cool to ambient and recover for 2 hours. Maintain contact resistance of 100 m Ω or less with no looseness or deformation.

Salt spray test: 35 ± 2 °C, RH 90-95%, 5% NaCl mist for 24 hrs. Wash parts after test. Maintain mechanical requirements and a contact resistance of less than 100 m Ω .

Operating range

-25 to 70 °C
