Pluggable fuse holder and Component holder Modification – SIHA 3/LD & BEST

Dear Valued Customer,
Weidmüller would like to inform you that a running change modification has been implemented for our line of fuse holders (SIHA 3) and component holders (BEST). This transition will be handled as an immediate running change and part numbers will not change from old to new. The modifications are as follows:

SIHA 3/LD Fuse Holder Change

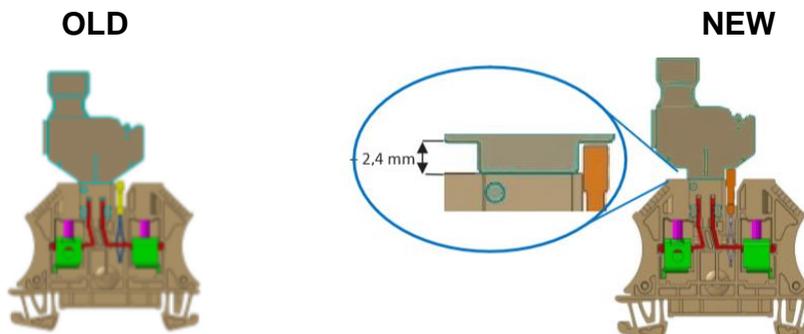

- 1.) Base of fuse holder has been raised to give clearance for a taller pluggable jumper which is currently used in our Push-In series of terminals.
- 2.) Color change to black for LED versions **Only!**

Note: All non-indicating SIHA 3 plug versions will remain beige in color.

BEST, BEST LD & BEST DRBR Component Holder Change

- 1.) Base of component holder has been raised to give clearance for a taller pluggable jumper which is currently used in our Push-In series of terminals.
- 2.) No color change to the component holder

Note: Soon we will consolidate to one pluggable jumper (Orange – Push-in Series version) to become the standard for screw clamp, tension clamp and push-in terminal technology. Thus, the modification on these holders.
