

ESSENTRA

May 31, 2018

Dear Channel Partner,

This is to inform you that Essentra has made the decision to obsolete the cable gland series CG, CGM, and CGPG. These are being replaced by the CG-NPT, CG-M, and CG-PG series of cable glands and accessories. Please see cross references as well as the full catalog pages provided on additional pages.

This rationalization will allow us to offer a higher quality product at the same value as before with greater more focused technical support. The replacement series will offer the same functional properties as you're familiar with as well as being UL/CSA approved and IP 68 rated.

Please note that we will no longer be offering the color gray as a standard stock item. All standard parts will be black.

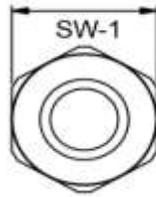

You are being notified because you have ordered one or more of these products in the past.

These parts will become obsolete on July 1st, 2018. You can, however, continue to order the old parts while stocks last.

If you would like to order any free samples for validation purposes or have further questions please contact me or your sales and service representative.

Best Regards,

Ryan Middlebrook
Commercial Director
Essentra Components

OBSOLETE
