New Tooling Design Change Assembly Process Equipment Material Testing
 Manufacturing Site Data Sheet / Dimensional Specification Other:

Description and Purpose of Change:

The UL/cUL/EN 60950-1 safety standard for power supplies has been replaced with UL/cUL/EN 62368-1. As a result, power supplies originally designed to the 60950-1 standard are becoming End of Life (EOL) and being replaced with new 62368-1 approved designs. The L6R15, L6R18, L6R15D, L6R18D, ICM15 and ICM18 Series are being replaced by the new L6R20 Series. The L6R20 Series is a 20W power supply (vs. 15W and 18W) and is physically smaller than the EOL models. Datasheets for all EOL series and the L6R20 Series are included for comparison.
