

M-IPN-5-M10X1-F

Ruland Mini Indexing Plunger With Knob, Thread M10x1.0, Pin Diameter 5mm, Knob Diameter 25mm, L 34mm, Steel

Description

Ruland M-IPN-5-M10X1-F is a mini steel indexing plunger with a plastic knob. It has a 5mm pin diameter, 6mm pin length, M10x1.0 thread, 8mm tapped thread length, 25mm knob diameter, 20mm knob height, and 34mm overall length. The small size compared to standard indexing plungers allows M-IPN-5-M10X1-F to be used in compact installations with space restrictions. This indexing plunger is commonly used for height adjustments, rotational or swivel limits, and as a quick way to detach a movable component from a stationary one. It is found in light duty applications where frequent repositioning is required. To operate, the user simply retracts the knob pulling the pin into the body of the plunger allowing a previously fixed component to be moved. Once the component is in the desired position, the user reinserts the pin into a mating hole in the stationary component. M-IPN-5-M10X1-F is manufactured by Otto Ganter, stocked by Ruland, and RoHS3 compliant.

Product Specifications
