

## Product Revision Notice PRN-0814

August 12, 2014

Dear Valued Customer:

This letter is to inform you of a revision to the Resistive 7.0" GEMmodule™ (MK-070R).

<b>Description of Revision:</b>	<p>A Rev B version of the MK-070R has been developed to incorporate a new data flash.</p> <p>The manufacturer of the data flash has issued a new revision that is not backwards compatible and they can no longer supply the old version that was used in the Rev A MK-070R.</p>
<b>Impact and Recommended Action:</b>	<p>The re-design will add an additional <b>4-6 weeks</b> to the published lead time for any new orders until full production begins.</p> <p>The Rev B MK-070R is form, fit and function the same as the Rev A part.</p> <p>Amulet will be introducing a new compiler and OS to coincide with the release of the Rev B part to program this device. The new compiler and OS will be both forward and backward compatible.</p>
<b>Who to Contact at Amulet:</b>	<p>Jim Todd, Director of Sales, <a href="mailto:jimtodd@amulettechnologies.com">jimtodd@amulettechnologies.com</a></p>

We apologize for any inconvenience this change may cause for you.

If you have any questions or concerns regarding this revision, please do not hesitate to contact our team member listed above.

Kindest Regards,

Paul Indaco  
CEO & President
